Dental curing light major manufacturer

## High intensity output

super high luminosity LED in the world

The ULight™ is offered with a super high luminosity LED. The light wavelength is between 440nm and 480nm and the intensity is more than 1000mW/cm<sup>2</sup>. It is an applicable tool. The ULight™ can work effectively within almost photosensitive polymerized composites.

## Never shutdown

If the temperature become too high due to continuous use, it will change to safe mode automatically and never shutdown.

## Germproof progress

keep it clean always

The ULight™ is used by the germproof material in the plastic cover. It can avoid the infection caused by bacteria or viruses effectively. It can also take care of the users' health easily.

## Simply Operate

fully function on two colors indication LED

- 5s Just one button and simply to operate
- 10s Fully function on two colors indication LED
- 15s Built-in thermal protection
- Keep it safty and long lifetime.

## Multi-curing timer

This function provides you with 3 kinds of the timer format to be selected.

• 5 sec • 10 sec • 15 sec

## Multi-curing output mode

This function provides you with different operation modes to be selected.
